

The Benefits of Lymphatic Massage

Fuel Wellness with a Healthy Lymph System

Cathy Ulrich

Six months after hip replacement surgery, Larry was learning to walk again and life was returning to normal. But one thing still puzzled him. When he stood for any length of time, his left ankle would swell, and when the inflammation was at its worst, his right ankle would also swell.

"I can understand why my left leg is swollen," he says. "But why would my right leg swell? I didn't have surgery there. And why am I getting swelling six months after the surgery? Shouldn't it be better by now?" The answer is that although Larry's surgery had occurred on the opposite side, the right leg would swell when the inflammation became too much for the left side to handle.

from the tissues, but few understand there is another equally vital system of vessels that removes cell wastes, proteins, excess fluid, viruses, and bacteria. The lymph system picks up fluids and waste products from the spaces between the cells and then filters and cleans them.

Like the roots of a tree, the lymph system starts as tiny vessels--only a single-cell wide--that eventually branch into larger and larger tubes that carry these fluids back to the blood stream. This network of delicate vessels and lymph nodes is the primary structure of the immune system. The lymph nodes act as check points along the pathways of the vessels. They filter the fluid (called lymph) and serve as the home for

Athletes, post-op patients, and those feeling over-tired can benefit from lymphatic massage.

Fortunately, lymphatic massage can help address Larry's problems. This special type of bodywork, while very gentle and seemingly superficial, helps to restore function to the lymph system and balance the body.

The Lymph System

Most people are familiar with the body's vessel system that carries blood to and

lymphocytes--little Pac Man-like cells that attack and destroy foreign bacteria and viruses and even abnormal cells, like cancer cells.

When the lymph system works well, we feel healthy and have a strong defense against illness. When it's sluggish or

blocked--say after surgery or an injury--we can have swelling, feel tired, and be more susceptible to colds and infections.

Lymphatic Massage

A customized form of bodywork, lymphatic massage may help the lymph system do its job better. By understanding the anatomy and function of this delicate system, your massage therapist can assist your body in clearing sluggish tissues of waste and swelling.

Though lymph vessels are found throughout the body, most of them--about 70 percent--are located just below the skin. These fragile vessels work to pick up fluids between the cell spaces when gentle pressure is applied to them from increased fluid build-up, muscle contractions, or the pressure of a therapist's hands. By using very light pressures in a rhythmic, circular motion, a massage therapist can stimulate the lymph system to work more efficiently and help it move the lymph fluids back to the heart.

Furthermore, by freeing vessel pathways, lymphatic massage can help retrain the lymph system to work better for more long-term health benefits.

Massage therapists versed in lymphatic drainage therapy, an advanced form of lymphatic massage, can identify the rhythm, direction, and quality of the lymphatic flow and remap drainage pathways.

Who Should Get It?

Lymph massage can benefit just about everyone. If you're feeling tired and low on energy, or if you've been sick and feeling like your body is fighting to get back on track, lymph massage would likely serve you well.

In addition, athletes, surgical patients, fibromyalgia and chronic fatigue sufferers, as well as those wanting a fresh look may want to consider lymphatic massage. Here's why.

After a sports injury or surgery, lymph vessels can become overwhelmed with the demand placed on them. When tissues are swollen, deep tissue techniques may actually cause damage to

the lymph vessels and surrounding structures. Lymphatic massage is often the treatment of choice, because it helps the body remove proteins and waste products from the affected area and reduce the swelling. This helps reduce pressure on cells and allows them to reproduce faster to heal the body.

Surgical procedures involving lymph node removal--such as breast cancer surgery--can cause limbs to swell. Severe limb swelling needs the attention of a medical team, but in milder cases, lymphatic massage alone may be enough to prevent or even treat the swelling. It's important that your doctor be involved in your care. Let your doctor know you'd like to see a massage therapist and make sure you have medical approval.

Lymph massage can also be part of a care program for fibromyalgia or chronic fatigue syndrome. Because it's so gentle,

it is well tolerated by these patients, who are often experiencing sore trigger points throughout the body. And by encouraging lymph flow and removing waste products, this gentle form of bodywork can help restore immune function and improve vitality.

Estheticians are trained in a very specific form of lymphatic massage. When you get a facial, your esthetician will gently massage your face to help improve lymph flow. When lymph is moving freely in the face, you'll have clearer, healthier skin without a buildup of toxins and fluids.

So, if you're feeling a bit sluggish, experiencing mild to moderate swelling, recovering from a sports injury, or interested in optimizing your lymph system for stronger immunity, ask your massage therapist about lymphatic massage. It can have a powerful impact

Lymphatic massage can help increase immunity and get you back on your feet after an illness.

A Walking Workout

Have Fun While Burning More Calories

Imagine the lone hiker, backpack laden with sleeping bag and bedroll, wielding a well-worn walking stick as she climbs the side of a snow-covered mountain. For centuries, trekkers have used walking sticks, partly as a defense against attacking wildlife, partly to aid in balance, and partly as support on long, arduous climbs. But in recent years, many hikers have replaced the single wooden walking stick with hiking poles.

Held in both hands and used to distribute weight more evenly through the four limbs, wilderness hikers have found poles invaluable for safety, efficiency, and comfort on long hikes. What wilderness hikers have known for some time now is that walking poles are a great way to relieve pressure on knees, ankles, and the back. They encourage better posture and provide a total body workout by engaging the upper body.

Now, hiking poles are showing up in urban areas as fitness walkers discover the benefits they provide. Nordic walking--similar in technique to cross-

country skiing--is a great way to get a whole body workout, increase oxygen consumption, and burn more calories than regular walking or even speed walking. This total body workout burns 40 percent more calories and consumes 25 percent more oxygen. Poles can be purchased at most outdoor sporting stores, along with rubber tips for use on paved paths.

TECHNIQUE

Adjust your poles to approximately 70 percent of your height and loosely secure the straps around your wrists. Hold the poles at an angle behind you so they propel you forward with a slight bend at the elbow. Use an opposite hand-and-heel motion as you walk--right heel strikes as left pole tip contacts the ground. And you're on your way! Don't be shy with your poles. Remember: You're burning 40 percent more calories.

For more information, visit www.walking.about.com/od/nordicwalking/index.htm.

Add walking poles, and burn more calories.

Massage for Seniors

Bodywork Improves Quality of Life

Almost 35 million Americans are age 65 or older, and about 2,000 more reach this age every day. As the U.S. demographic shifts to an older population, it's important to find ways of helping our elders maintain their health and vitality. Massage for seniors is gaining importance as an alternative therapy to increase quality of life, and many massage therapists are getting special training to better serve this growing population.

SENIORS' SPECIAL NEEDS

While similar in technique to other forms of massage, geriatric massage considers the special needs of the elderly. The specialty trained practitioner knows about positioning for greatest comfort and will often have

the client rest in the same position for the entire massage. Mobility challenges may dictate the massage be done in a bed or wheelchair. The therapist may also work both sides of the body at the same time to enhance body awareness, or only work hands and feet, if the client prefers. Sessions may be limited to 30 to 45 minutes, as older clients often do better with shorter, more frequent, massages.

The geriatric massage therapist is aware of health issues associated with aging and how to safely work with this type of client and with associated physicians. Consequently, the practitioner is able to individualize the massage service based on the client's health, mobility, and comfort level.

BENEFITS OF GERIATRIC MASSAGE

A recent study conducted at the Weaver's Tale Retreat Center in Oregon looked at the effects of massage for elderly clients. The results of the two-year study showed that participants experienced a decrease in breathing rate of 50 percent and an improvement in range of motion, posture, body awareness, skin color, and muscle tone. Furthermore, it is well documented that caring touch benefits emotional well-being in seniors -- a population at greater risk of suffering from depression.

Massage therapy can add to the quality of a senior's life, both physically and emotionally. Consider booking a session for someone you love, and make a difference in their life.

*Your vision will
become clear
